ABOUT ME

An R&D leader with 16 years of international experience in Data Science, Machine Learning, and AI. I possess a unique blend of academic expertise (Candidate of Technical Sciences, Russia; PhD, USA) and a proven track record of building IT products for millions of users. My areas of specialization include commercializing complex scientific innovations, architecting high-performance data pipelines, implementing generative AI, and leading cross-functional teams of engineers and analysts.

KEY ACHIEVEMENTS

- **Advanced Analytical Pipeline and Machine Learning Development.** Implemented a Gen AI solution at Chegg, Inc. that enhanced the efficiency of a critical solver component by 11%.
- **Strategic Product Management.** Championed the diagnostic model at ACT, Inc., which enabled a new data product, doubled client engagement.
- **Research and Publishing Excellence.** Coauthor of 2 US patents, and 90+ peer-reviewed papers; organized 5 workshops and 1 conference, delivered 20+ academic and industrial conference presentations.

PROFESSIONAL EXPERIENCE

Akyn Avtomatika Consulting, Russia
chief technology officer

January/2023–now

- Led the development and implementation of AI data processing infrastructure and automated content production.
- Organized the development of an audio-video processing application, increasing the client team's output fivefold.

myProse, consulting project, USA
chief technology and architecture consultant

September/2025–June/2026

- Built the startup's technology infrastructure.
- Developed the go-to-market strategy.
- Organized the development and launch of the MVP.

Chegg, Inc., USA
staff AI engineer

June/2022–November/2024

- Developed a retrieval-augmented generation (RAG) service and carried out 20+ analytical experiments.
- Spearheaded fine-tuning a Gen AI model for extracting expressions boosting service component's accuracy by 11%.
- Led a cross-functional team (engineers, analysts, data labeling experts) in developing quality assessment systems for AI models.

BrainPOP, Inc., USA

April/2021–June/2022

principal machine learning & AI engineer

Led product development of ML/AI information system and data governance infrastructure for a suite of NLP solutions and data pipelines.

ACT, Inc., USA

July/2017–April/2021

senior research scientist/senior software developer, emerging technologies department

- Instrumented a diagnostic model project improving user experience for 100,000+ students solving 3.3M problems a month, adapted the model for 2 external vendors.
- Devised an algorithm-selecting workflow that became part of 1 granted U.S. patent.

Carnegie Mellon University, USA

January/2016–May/2017

project scientist, human-computer interaction institute

- Coordinated efforts on scaling a suite of affect detectors to serve up to 60 million students.
- Co-authored a man-machine tutoring method featured in 1 publication with 20 citations.

Carnegie Learning, Inc., USA

March/2013–January/2016

research scientist

- Optimized an algorithm serving 0.5 million users a year to save 37% of the in-app time.
- Headed a multi-team effort analyzing data of 350 000 users and built analytical pipeline.
- Brokered a transfer of 1 billion records of user data from the vendor and carried out 1000+ data modeling replays.

Carnegie Mellon University, USA

October/2010–February/2013

post-doctoral fellow, human-computer interaction institute

- Created and published a novel model of student learning (publication received 600+ citations).
- Developed an industry-first open-source tool to fit Bayesian models on datasets of up to 1 billion records.

SKILLS

Technologies: Python, R, SQL, C/C++, Java, DataBricks, YandexCloud, AWS, TensorFlow, PyTorch, Terraform, JIRA, Confluence.

Methods: statistics and regression analysis, building, maintaining and evaluating machine learning models, data modeling, data engineering, natural language processing, deep learning, SaaS, agile, CI/CD.

PUBLICATIONS

US Patents: 2, papers: 96, citations: 2800, H-index: 28.

EDUCATION**University of Pittsburgh, USA**

2004–2010

*doctor of philosophy, information sciences***Ivanovo State Power University, Russia**

2001–2004

*candidate of technical sciences, computer aided design and manufacturing systems***Ivanovo State Power University, Russia**

1996–2001

*systems scientist, computer aided design and manufacturing systems***LANGUAGES**

Russian – native, English – professional mastery
